SECURE MESSAGING

You know us as the Dependable Choice for traditional paging, but you might not know that with our IntelliMessage® Mobile Applications we deliver critical messages to smart devices and desktop computers as a completely free enhancement to the American Messaging paging experience

We've Got You Covered With:

- Message Protection with PINs
- The ability to disable applications if the device is lost or the employee leaves
- Stored message protection
- No need for costly on premise hardware
- Secure and Cloud based – no messages reside on the devices
- Import your address book

- Send, receive, and search your message history
- View receipts or acknowledgements and replies from other smart devices
- Change your status and re-route your messages
- It's Quick and Easy. Once your account is registered by the administrator, you get an email invitation, download the app and log in
- And best of all – there's NO MONTHLY FEE for existing paging users, and for non-paging users we have several low cost options
