

## How do all my devices behave during a status event?

| Status               | Pager  | Applications  | PageCopy  |
|----------------------|--|---|---|
| <b>Available</b>     |  <p>Paging as usual. Callers will hear a prompt stating the user can enter their message</p>  |    |    |
| <b>Out of Office</b> |  <p>Paging as usual. Callers will hear a prompt stating the user is Out of Office and their response may be delayed</p>   |    |    |
| <b>Unavailable</b>   |  <p>No paging. Callers will hear a prompt stating that the user is Unavailable (until date/time) and cannot receive any messages at this time</p>                       |    |    |
| <b>Forward</b>       |  <p>No paging. Callers will hear a prompt stating the user is currently forwarding messages to xxx-yyy-zzzz (until date/time). Please enter your call back number</p> |  |  |
| <b>Referral</b>      |  <p>No paging. Callers will hear a prompt stating the user is referring their messages to another associate. Enter a phone number to receive the referral number</p>  |  |  |
