***Don't Sweat It!
The Choice
Is Simple...***

AMS Connect Is Really The Only Choice – And Here's Why

We've Got All Those Bells & Whistles Everyone Else Promises – However No One Else Can Deliver:

- **Critical Messaging Integration – Receive pages simultaneously on Smart Phones and Critical Messaging Devices**

Workflow Continuity and Redundancy - No need to change or use new messaging processes as your existing processes will send messages seamlessly to both Smart Phones and Messaging Devices, providing workflow continuity and redundancy

- **Low Monthly Cost – One-time institution set up and implementation fee**

No large app commitments required. Discount for bundling the app with your American Messaging messaging devices

- **Single point provisioning and a single, consolidated invoice for both Critical Messaging and AMS Connect**

- **Enhanced services for future clinical integration requirements**

- **Account Management**

Long standing, proven relationships – no need to break in a new vendor! Your trusted American Messaging Account Manager supports both Critical Messaging and AMS Connect

Getting Started Couldn't Be Easier

- Sign a BAA (Business Associate Agreement) and a Terms of Service Agreement
- Send us a spreadsheet of users with their name, email address, specialty and messaging device number
- On the day you specify, we provision the users and send them a welcome email with their login and password credentials
- Users simply download the AMS Connect app and then login with the credentials provided in the email
- Critical messages initiated using your existing processes will immediately begin to arrive on the user's Smart Phone and Messaging Device and they will be able to deliver secure messages using the AMS Connect app
- We are happy to meet in person or via a webinar to answer any questions and to provide a quick training session
