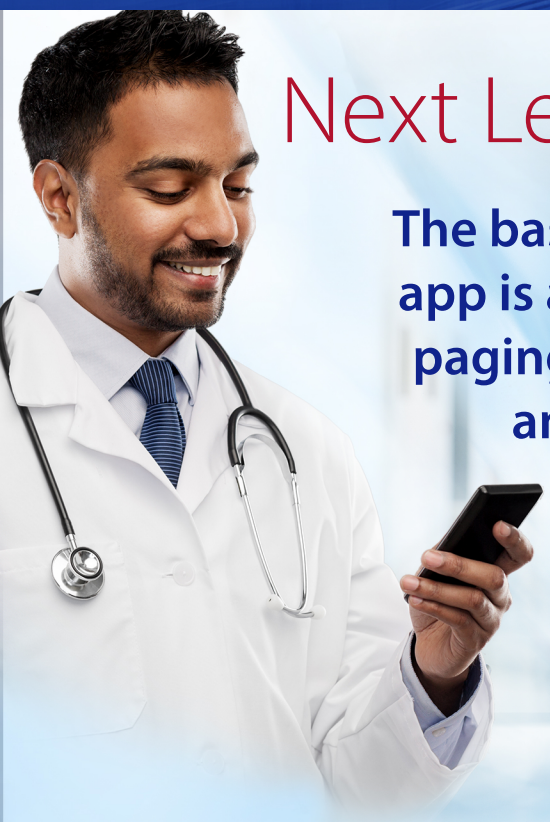
AMSConnect™

American Messaging
The Dependable Choice℠



Next Level Basic has Arrived!

The basic version of our AMSConnect app is a secure enhancement to your paging system, adding redundancy and convenience to critical messaging workflows.

...and it's anything but Basic!

- **Pager Integration**: Receive each message on your traditional pager and the app for backup and redundancy
- **Services:** Ability to opt in and out of on-call or rotating service pagers as needed
- **Status/Message Forwarding:** Designate yourself as Available, Busy or Off Duty. When Busy or Off Duty, select a covering colleague and your pages will automatically forward to them
- **Alert sounds and Repeat reminders:** Customize the alert tone and message repeat options for each type of message
- **Archiving:** Ability to archive single, multiple or all messages
- **Web and Mobile sync:** Whether you use our web portal or the mobile app, your account will always be in sync

Don't want to be labeled Basic? Ask about Prime features.
