

## *Important – MyAirMail Upgrade*

*In our ongoing effort to continuously offer the most modern, reliable, and secure applications, we are upgrading the current MyAirMail dispatch portal to a new look and feel called Message Manager. No action is required on your part!*

*Any Login, Password and Address Book in place now will transfer to the new site seamlessly.*

*Based on the URL you use today, here are dates to be aware of:*

*2/3/2021 - No new user registrations, password changes, new address books, or existing address book adds / changes / deletions*

*Dates to transition to the upgraded Message Manager:*

*2/8/2021 – <https://secure.myairmail.com> (recommended site)*

*2/9/2021 – <https://myairmail.com>*

*2/10/2021 – <http://myairmail.com>*

*Snapshot of the Message Manager portal:*

### *\* Notes:*

- 1.) For security purposes it is highly recommended that you transition to <https://secure.myairmail.com> as soon as possible using TLS 1.2 or later.*
- 2.) It is not a best practice to use IPs to connect to internet paging services. American Messaging may change an IP address for a service at any time. We strongly encourage use of the secure domain based URL.*
